

Underground Mine Safety

An integrated approach for the course and personnel development

A. Binder, A. Hutwalker, O. Langefeld, J. Bauermeister, **M. Bothe-Fiekert**, Nowosad, S.

Windhoek, 13.09.2022

Are we on the same page?

Open your hand and raise it a bit

Put a finger
down if...

...safety is the topmost priority in Mining.

...you have been thrown in cold water at your first
teaching experience.

... there no mining-specific program for teaching in
higher education at your institution.

...there no structured initial course development due
to many factors in your situation.

Our goal and in a special situation

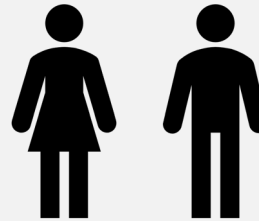

GOAL

Creation and implementation of the course “Underground Mine Safety”
Teaching skill development for Junior Lecturers

TEAM

Responsible Person

T&L Experts

Junior Lecturers

Expert

BASE

Framework

Master ME
1 hpw / (14+46)h

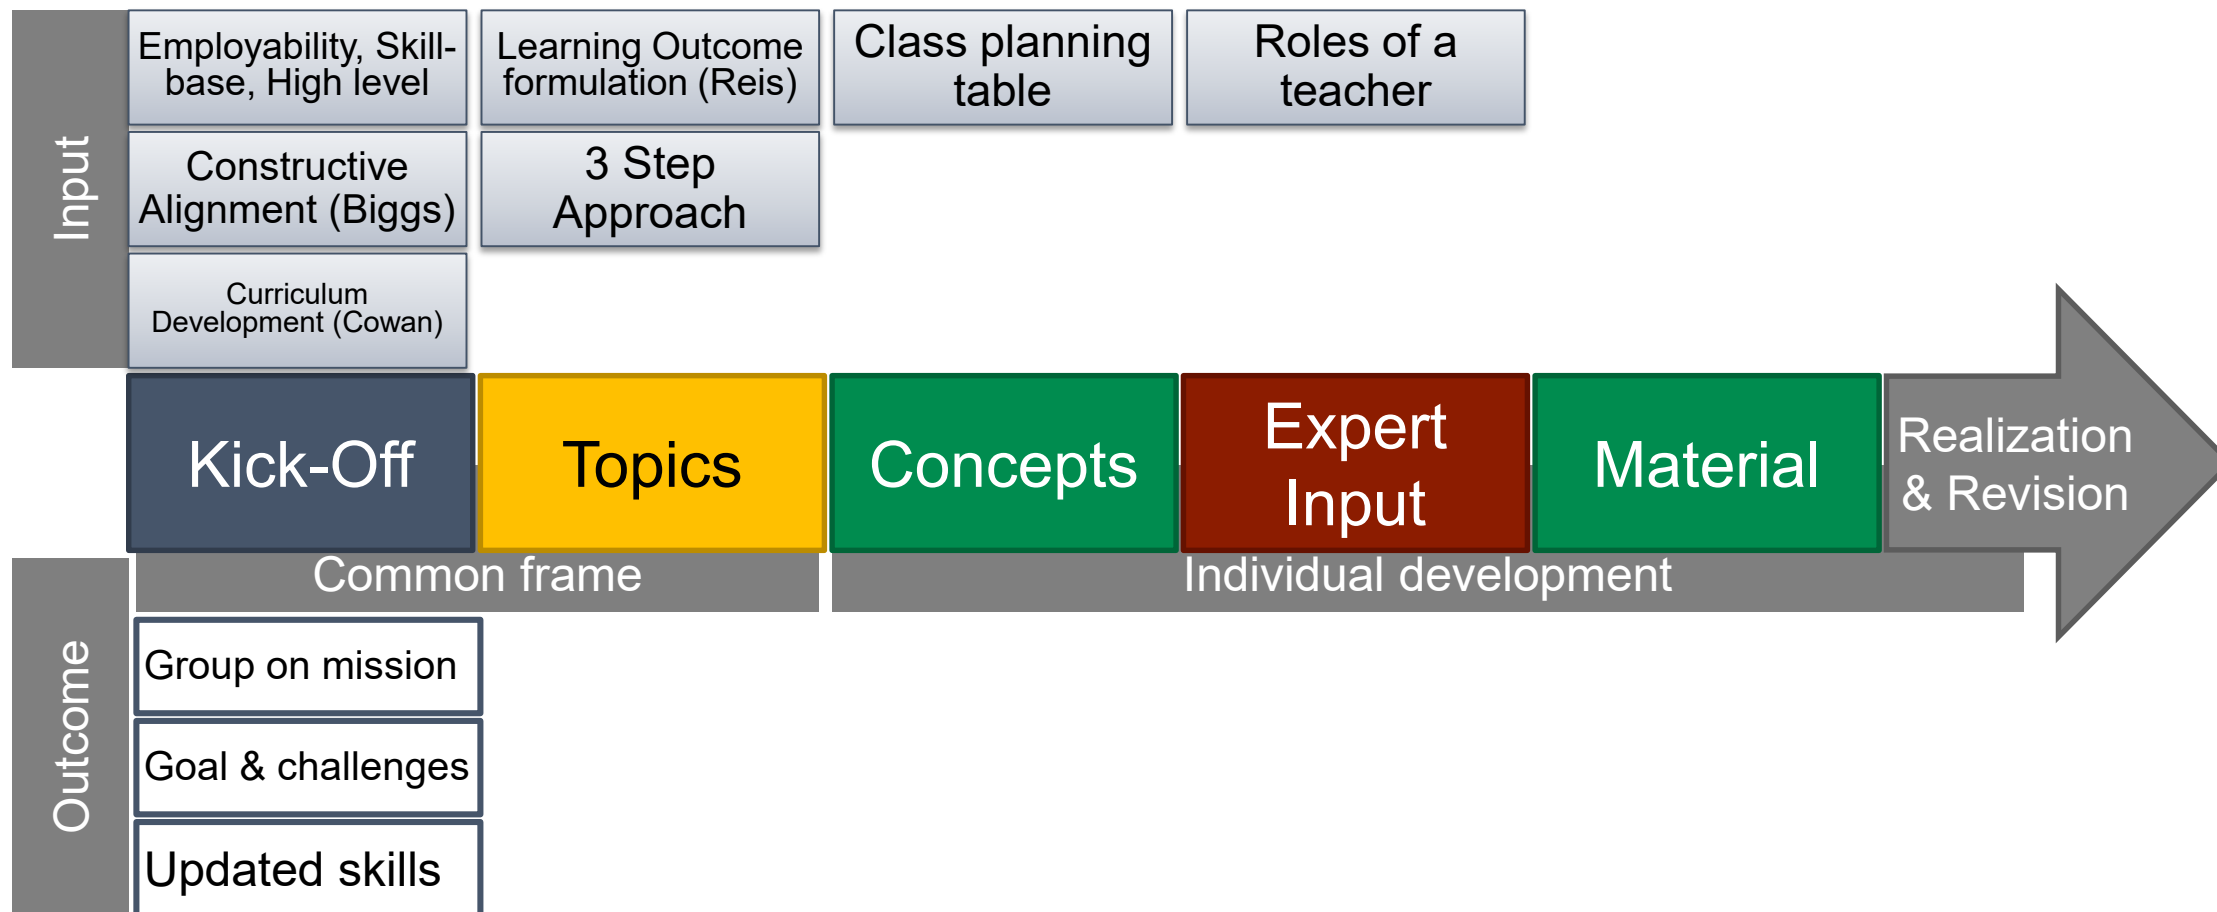

Exam

Written exam
(to be created)

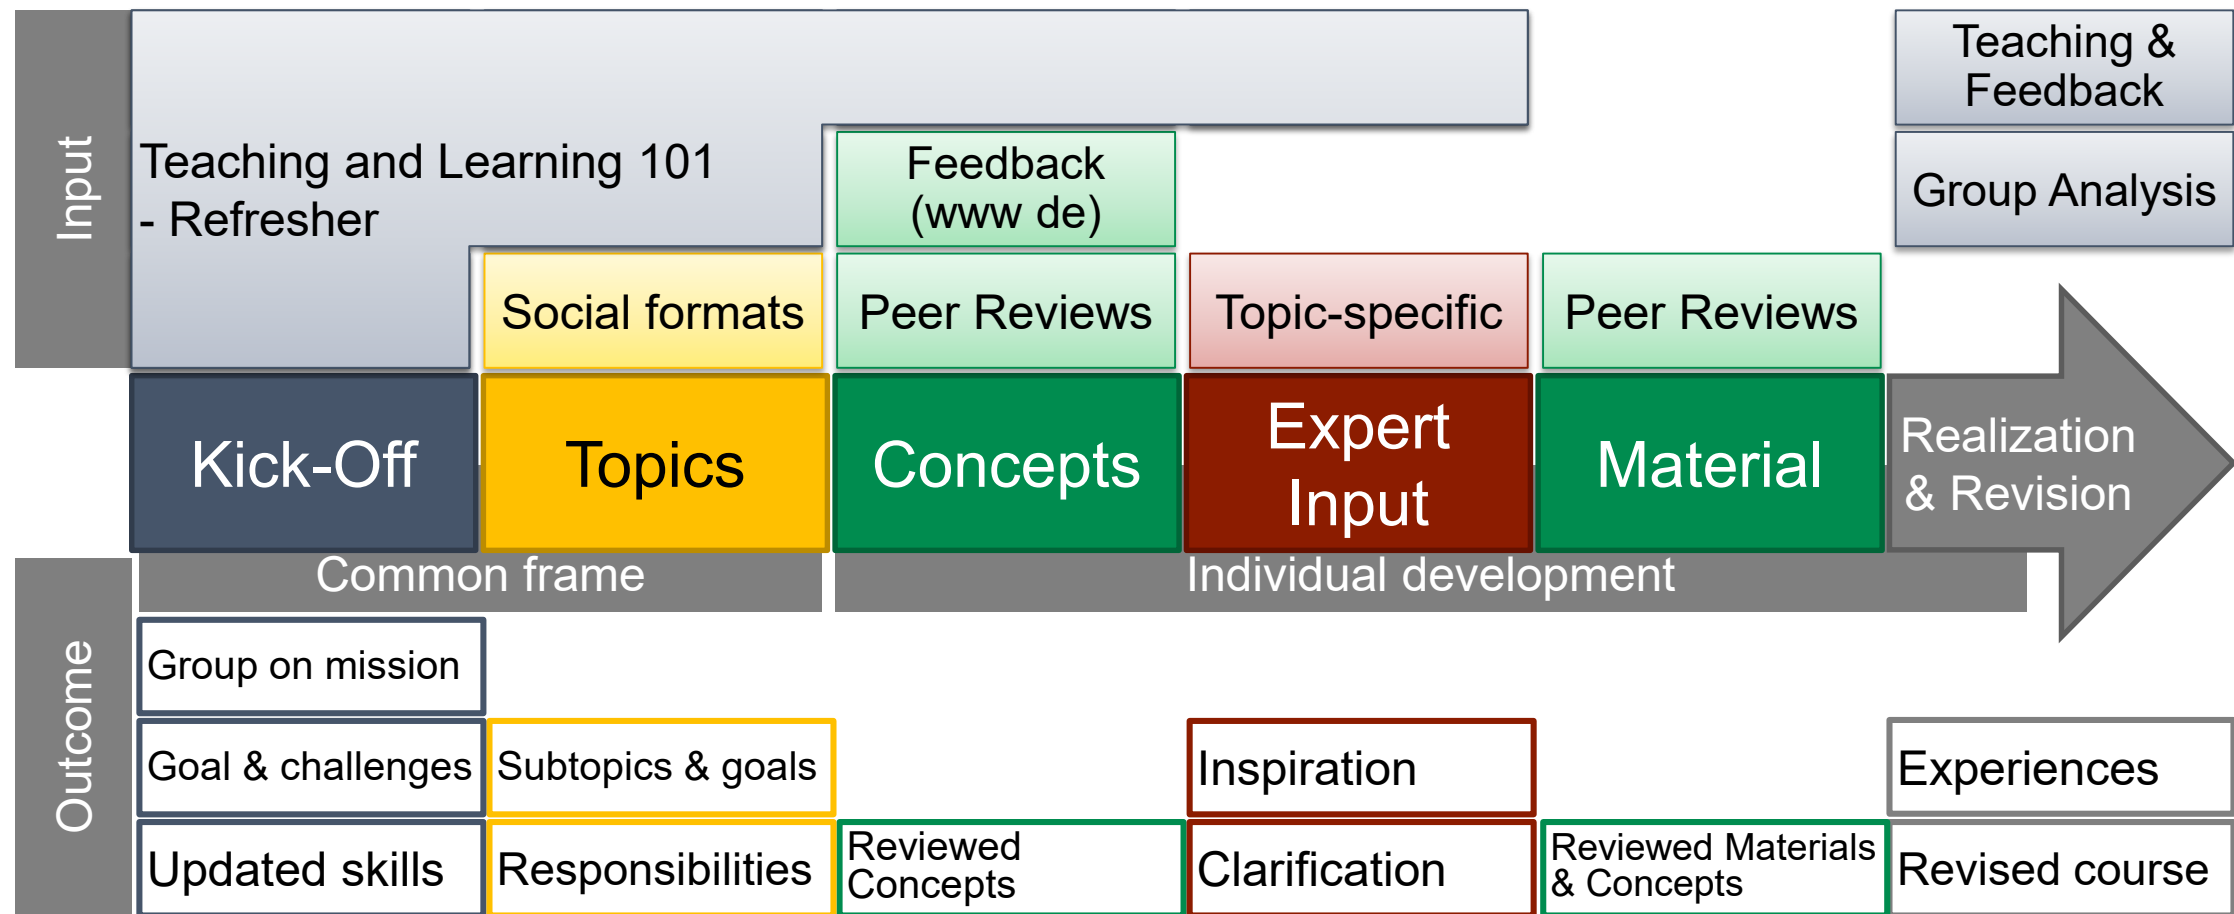

Prel. Preparation

193 pages of script
and 354 slides

Approach of course & personnel development

Approach of course & personnel development

Implementation: Course structure

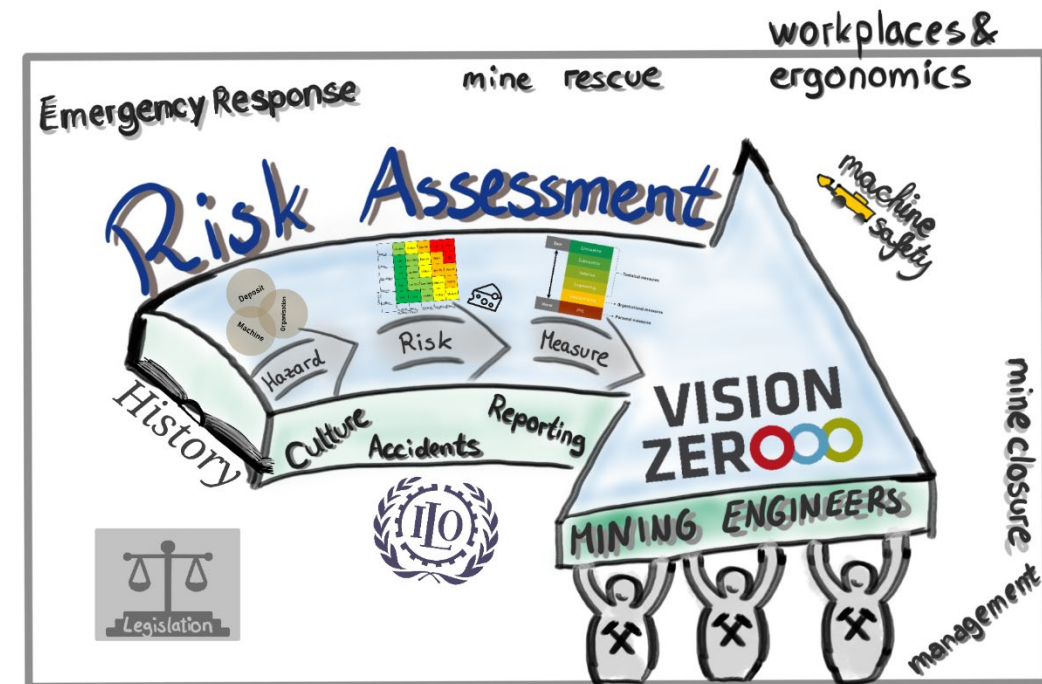

Introduction to Underground Mine Safety

Specific OSH **Hazards** in Underground Mining and Legislative Background

Risk Matrix as a core element of Risk Assessment

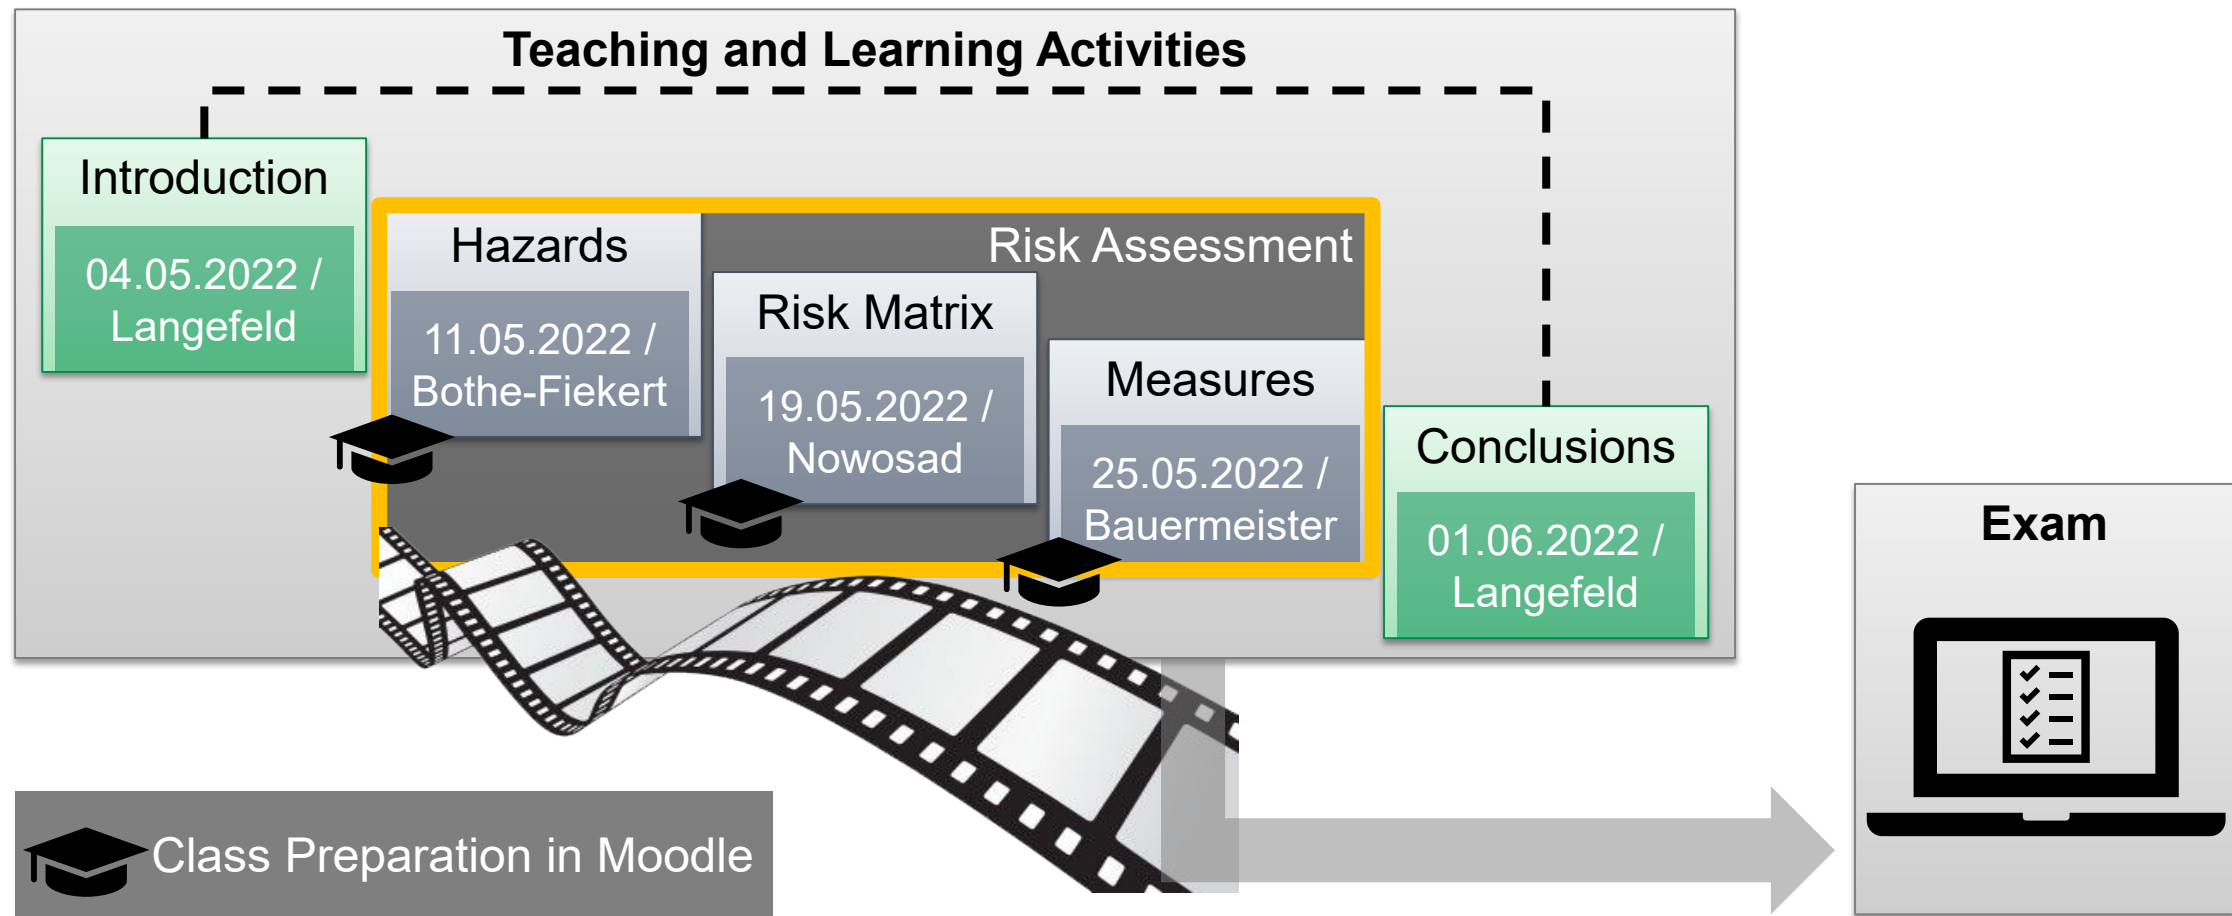

Safety **Measures**

Conclusions on Underground Mine Safety

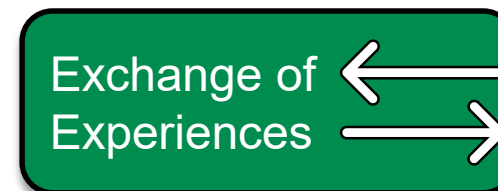

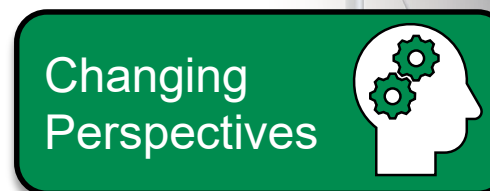

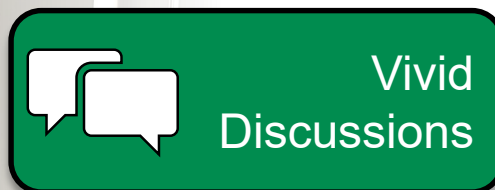

Occupational Safety & Health

Implementation: Course structure

Implementation: Concepts

Experiences & results

Have you felt like been thrown in cold water ?

Keep Swimming

Time Management

Keep Cool

Experiences & results

How do you prepare the next class or course?

Define
